Education

- **ESPRIT Engineering School** Sep. 2024 – Present
  Software Engineering Degree — Entering 3rd Year *Ariana, Tunisia*
- **ISSATS — Higher Institute of Applied Sciences & Technologies** Sep. 2021 – May 2024
  Bachelor of Science in Computer Science *Sousse, Tunisia*

Skills

- **DevOps:** Docker, Kubernetes, Jenkins CI/CD, AWS (fundamentals)
- **Backend:** NestJS, Spring Boot, Django, REST APIs, Microservices
- **Frontend:** React, Angular 17, TypeScript, TailwindCSS, Bootstrap
- **Data & ML:** Python, FastAPI, Scikit-learn, XGBoost
- **Tools:** Git, GitHub, Jira, Slack, Figma, Canva
- **Languages:** Arabic (Native), French (C2), English (Advanced)

Experience

- **Drivago** *Full Stack Developer Intern* Tunisia *Jun. 2026 – Present*
  - Developing and maintaining frontend/backend features while conducting UX research to support the evolution of a SaaS platform for driving schools.
- **ERNST** *Full Stack Developer Intern* Tunisia *Feb. 2024 – May 2024*
  - Built a multi-platform queue management system for Orange Tunisia: web (ASP.NET Core MVC), mobile (Flutter), and desktop (WPF).
  - Handled UML analysis, Figma prototyping, full-stack development, and API integration.
- **Freelancer** *UI/UX Designer* Remote *2023 – Present*
  - Delivered UX/UI solutions like user research, Figma prototyping, branding, and collaboration with international clients.
- **ERNST** *UI/UX & Flutter Developer Intern* Tunisia *Jun. 2023 – Sep. 2023*
  - Contributed to a mobile e-commerce application by designing UI/UX interfaces and branding in Figma, developing the Flutter frontend, and integrating APIs.

Academic Projects

- **Smart Property — AI-Powered Real Estate Platform** *2025–2026*
  - Covers the full property lifecycle (listings, contracts, payments, disputes) across 5 user roles with AI price estimation, tenant matching, and vision-based descriptions.
  - NestJS · React/Vite · TailwindCSS · MongoDB · 3 Python AI microservices · Stripe · Socket.IO · Docker · Kubernetes · Jenkins CI/CD
- **Real Estate Price Estimator — ML Microservice** *2024–2025*
  - Sale & rent price estimation models with geo-aware fallback for unknown regions, each deployed as an independent Kubernetes pod.
  - Python · XGBoost · scikit-learn · FastAPI · Docker · Kubernetes
- **DigiService — Microservices based Platform**
  - Marketplace connecting clients with tradespeople, improving pricing transparency and artisan visibility.
  - Spring Boot · Angular · Docker Compose · Eureka · Spring Cloud Gateway
- **Innomall: A Mall Platform**: Desktop and web applications streamlining interactions between administrators, shop owners, and clients in a mall ecosystem. Stack: Symfony 6, Java, JavaFX, MySQL.
- **Music Recommender**: Music recommendation model using Python, TensorFlow, and Scikit-learn based on collaborative filtering.
